

ANILOX CLEANING PADS

Description:

MAXXKLEEN Anilox Cleaning Pads are designed to clean and restore anilox rollers to peak performance without causing damage to delicate cells. Each pad contains over 1 million densely packed indestructible nylon 6.6 fibres that penetrate deep into every anilox cell to lift out stubborn dried in ink.

Designed for use with **INK KLEEN** or **PRINT KLEEN** solutions, these pads allow you to apply cleaner directly to the roller surface for maximum cleaning performance. The design makes them easy to hold and control, enabling gentle yet highly effective cleaning.

The pads are waterproof and fully washable meaning each pad can be reused multiple times while maintaining top-level performance.

Whether used for daily maintenance or intensive deep cleaning, our Anilox Cleaning Pads deliver professional grade results every time.

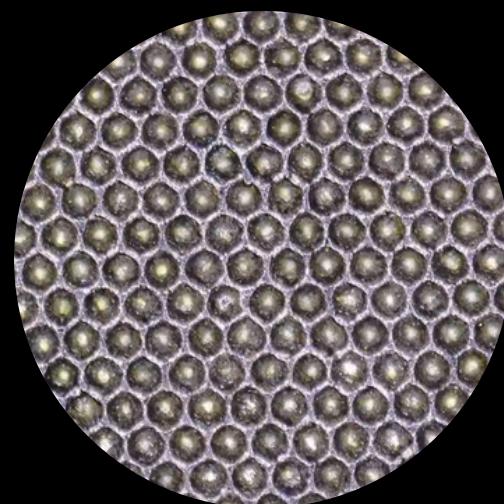

Key Features:

- **Deep Cell Penetration** – Gently reaches into microscopic anilox cells to remove stubborn ink.
- **Maximum Cleaning Power** – Over 1 million densely packed nylon 6.6 fibres per pad for unrivalled cleaning performance.
- **Safety** – Cleans effectively without damaging delicate anilox cells.
- **Reusable & Durable** – Waterproof, washable and built for long lasting performance.
- **Easy to Use** – Easy to hold for effective precision cleaning.
- **Works with Proven Cleaners** – Works perfectly with **INK KLEEN** or **PRINT KLEEN** solutions.
